**Subject:** Fibre Installation Update for Wakaw Lake & Civic Addressing on Google Maps

Good afternoon,

The RM of Hoodoo would like to share the following updates with property owners at Wakaw Lake:

1. **Civic Addresses are now appearing on Google Maps!**

*\*Please note – we are aware the road names around the beaches are showing up incorrectly – we are working to identify a method to update this information with Google*

2. **Information Regarding Fibre Optic Infrastructure Installation**

The RM has recently issued permission for FlexNetworks to install fibre optic cable infrastructure within the RM road allowance at locations requested by FlexNetworks. This permission applies **only** to the use of municipal road allowance. The RM is **not involved in service provision, service agreements, or signup processes**, and **will not be sharing any ratepayer information** with FlexNetworks. If property owners wish to request a connection or obtain further details, they must contact FlexNetworks directly, [home@flexnetworks.ca](mailto:home@flexnetworks.ca). Below is information provided by FlexNetworks for residents who may be interested:

**Message from FlexNetworks (as submitted to the RM)**

FlexNetworks is excited to formally announce the details around our market entry to the RM of Hoodoo – Wakaw Lake. We are excited to bring our award-winning Fibre-Optic Internet that is Saskatchewan’s Fastest and Most Reliable Internet to Wakaw Lake . Our offers during the construction phase come with added value so we encourage residents to sign up now. We have offers for both Full Time and Seasonal Residents. Preliminary construction is now underway, and our construction partner, WesTower, will be facilitating the fibre line construction.

Residents can find all the details on our offerings, timelines, and FAQs from this link below. **A unique new offering for 2026 is the Permission to Install Form (located in the link below). This allows our crews to bring a fibre line to the outside of a home, at no cost or obligation to sign up for service, while construction is taking place. Importantly, the line only offer is available while the crews are in the community and will not be an option in 2027.**

Please don’t hesitate to contact our Head Office team in Saskatoon for any additional questions or concerns. We are all so excited to add Wakaw Lake to our growing list of communities and we can’t wait to talk to the residents. Feel free to share this message.

Thank you!

Warmest Regards,  
your FlexNetworks team
